Total Pounds		794.18	
Total Sent for Recycling		716.18	90.20%
Total Stops		9	

Notes:

This report is created from data gathered at the point of collection. At Your Door Customer Service Technicians record every item collected from every home.

- Liquid materials are listed in detail reports as gallons.
- Solid items are listed as pounds, feet or each.
- The computer will perform calculations to convert feet, each and gallons to pounds using industry standard weights. For example, 8.5# per one gallon of used oil. Weights of solids are taken from the containers. For example, a 10# bag of fertilizer that is half-full would be recorded as 5#.

Paint and other liquids are periodically weighted and the average weight is adjusted in the computer. Future adjustments may result in changes to previous reports.

Electronic items are periodically weighed. The average weights used are subject to revision. Future adjustments may result in changes to previous reports.

Weights do not include the weight of outbound shipping containers. The difference between total pounds shipped for recycling and total pounds collected are materials that are not recycled. These materials may be incinerated, neutralized or sent to a landfill.

Some acceptable recycling processes can generate residue that is or cannot be recycled for example, contaminants such as trash packed into paint cans.
