(1978 Code §44.13)

C. Driving To Left Of Center:

1. No snowmobile shall be driven to the left side of the center of the roadway in overtaking and passing another vehicle proceeding in the same direction, unless such left side is clearly visible and is free of oncoming traffic for a sufficient distance ahead to permit such overtaking and passing to be completed without interfering with the safe operation of any vehicle approaching from the opposite direction or any vehicle overtaken and without endangering any person or property. (1978 Code §44.14)
2. No snowmobile shall be driven on the left side of the roadway when approaching or upon the crest of a grade or curve or where the driver's view is obstructed or when approaching within one hundred feet (100') of or traversing an intersection or railroad grade or crossing or when the driver's view is obstructed upon approaching within one hundred feet (100') of any bridge, viaduct or tunnel, and no driver may pass to the left where signs or markings are in place to define a "No Passing Zone" as indicated by pavement striping or appropriate signing. (1978 Code §44.15)

D. Right of Way:

1. Generally: Any snowmobile approaching or entering an intersection from a different roadway shall yield the right of way to a vehicle on the opposite roadway which is entering from the right at approximately the same time. The driver of the vehicle or snowmobile on the left must yield the right of way to the vehicle on the right. (1978 Code §44.22)
2. Left Turns: The operator of a snowmobile intending to turn to the left within an intersection or into an alley, private road or driveway shall yield the right of way to any vehicle approaching from the opposite direction which is so close as to constitute an immediate hazard, but said snowmobile operator having so yielded may proceed at such time as a safe interval occurs. (1978 Code §44.21)
3. Entering Stop Intersections: Except when directed to proceed by a peace officer or traffic-control signal, every operator of a snowmobile approaching a stop intersection indicated by a stop signal or traffic-control signal shall stop before entering the crosswalk on the near side of the intersection or if none, then at the point nearest the intersecting roadway behind the stop sign or traffic-control signal where the operator has a view of approaching traffic on the intersecting roadway before entering the intersection. After having stopped, the operator of

the snowmobile shall yield the right of way to any vehicle which has entered the intersection from another roadway or which is approaching so closely on the roadway as to constitute an immediate hazard during the time when the operator is moving across or within the intersection, but said operator having so yielded may proceed at such time as a safe interval occurs. (1978 Code §44.23)

4. Entering a Yield Intersection: The operator of a snowmobile approaching a yield sign shall, in obedience to such sign, slow down to a speed reasonable for the existing conditions and, if required for safety to stop, shall stop before entering the crosswalk on the near side of the intersection or if none, then at the point nearest the intersecting roadway where the operator has a view of approaching traffic on the intersecting roadway. After slowing or stopping, the operator shall yield the right of way to any vehicle in the intersection or approaching on another roadway so closely as to constitute an immediate hazard during the time such operator is moving across within the intersection. If a snowmobile is involved in a collision at an intersection or interferes with the movement of other vehicles after driving past the yield right-of-way sign, such collision or interference shall be deemed prima facie evidence of the driver's failure to yield the right of way. (1978 Code §44.24)
5. Pedestrians: The operator of a snowmobile shall yield the right of way, slowing down or stopping if need be, to so yield to a pedestrian crossing a roadway within a crosswalk, but in any case, every driver of a snowmobile shall exercise due care to avoid colliding with any pedestrian and shall exercise proper precaution upon observing any child or any obviously confused, incapacitated or intoxicated person. (1978 Code §44.27)

E. Operator Required to Give Signal:

1. Signals Required: A signal of intention to turn right or left when required shall be given continuously during not less than the last one hundred feet (100') traveled by the snowmobile before turning within a residential district. (1978 Code §44.18)
2. Signal by Hand, Arm or Signal Device: Any stop or turn signal, when required, shall be given either by means of a hand and arm or by electric turn signal device conforming to the requirements of 625 Illinois Compiled Statutes 5/12-208. (1978 Code §44.19)
3. Method of Giving Arm and Hand Signals: All signals required by this Chapter shall be given from the left side of the vehicle in the following manner:

 - Right Turn - hand and arm extended upward.

-Stop or Decrease Speed - hand and arm extended downward.

(1978 Code §44.20)

F. Following Too Closely: The operator of a snowmobile shall not operate his snowmobile behind another vehicle at a distance more closely than is reasonable and prudent having due regard for the speed of such vehicles and the traffic upon and the condition of the highway on which they are traveling. (1978 Code §44.16)

G. Starting Parked Snowmobile: No operator shall start a snowmobile which is stopped, standing or parked unless and until such movement can be made with reasonable safety. (1978 Code §44.17) H. Prohibited Operations:
