UNDER PENALTIES OF INTENTIONAL MISREPRESENTATION AND/OR PERJURY, I declare that I have examined and/or made this application and it is correct to the best of my knowledge. I agree to construct said improvement in compliance with all provisions of the Building and Zoning Ordinances and all amendments thereto. I realize that the information that I have affirmed hereon forms a basis for the issuance of a building permit.

I also understand that as a homeowner, I am responsible for complying with subdivision Codes, Covenants & Restrictions of the property address, if any exist. The City of Genoa is not liable for any action that a property owner takes in contradiction to applicable subdivision CC&R's.

TREE PROTECTION PERMIT FORM

The parkway tree protection permit for construction activity is required if there are existing trees located in the City's parkway either in the front yard or the corner yard.

A public tree protection permit is required for any building permit that involves:

- The construction of a new building or structure
- Site improvements
- Any type of remodeling
- Roofing
- Flat work (concrete or asphalt paving)
- Fencing
- Paver brick work
- Other _____

Construction Activity Zone:

- Do not place any type of dumpster, building materials or equipment under a tree.
- Do not clean equipment under any tree.
- Do not make any grade changes, cut or fill under a tree or in the critical root zone that extends 20 feet from the furthest edge of the tree canopy.

It is the responsibility of the contractor and building permit holder as a condition of the permit to protect all public trees (including a neighbor's tree) located on the adjacent parkway/ public right-of-way that may be affected or damaged by construction activities. Any area under a parkway tree extending outward to the end of the tree canopy is designated as the tree protection zone. If a tree extends over a sidewalk or driveway, the protection zone would continue to the end of the canopy.

Depending on the type of construction activity, the City may cordon-off the tree protection area with stakes and ribbon. Once installed, the contractor and the building permit holder would be responsible to maintain the stakes and ribbon throughout the duration of the project. When the work is completed, the permit holder is required to notify the City to have the stakes and ribbon removed.

Upon inspection by the City, failure to meet the above requirements would be an ordinance violation and may warrant a penalty as prescribed in Title 7, Section 4, of the City's Municipal Code and the Public Works Director Public may have the work stopped until the construction activity is guarded with a substantial fence that would be installed by the building permit holder at their cost.

Name: _____ Date: _____ Permit Number: _____

Address: _____

Contact Person: _____ Phone Number: _____

A tentative start date is required. Date: _____ The applicant is also required to contact the Public Works Department, Janice Melton at (815) 784-2271, if the construction activity starts before or after the tentative start date.

TREE PLANTING REQUIREMENTS

New home construction requires a parkway tree(s). The number of trees required to be planted are determined by the length of the property along the street abutting the front yard and the corner yard. The length of both yards are **not combined** and are measured separately to meet the minimum requirement for one parkway tree per 80 feet in length of property for each of the applicable yards. The City will determine the type of tree, the site location, and plant the tree(s) per the Arboricultural Specifications after the occupancy permit is approved by the City subject to the planting schedule. (Spring 3rd wk April – 1st wk June) (Fall 1st wk September – 3rd wk October)

For additional information, please contact the Public Works Department, Janice Melton at (815) 784-2271.

New Home Construction: Yes _____ No _____ (Front Yard Length: _____ FT. - Number of Trees to be planted: _____)

(Corner Yard Length: _____ FT. - Number of Trees to be planted: _____) (**Total number of trees to be planted:** _____)

Number of existing parkway trees: (Front Yard _____) (Corner Yard _____). Is the tree(s) located closer than 15 feet from the proposed driveway approach Yes _____ No _____.

Official Use: Email to JM/C: RG

- For new homes w/out trees, email the plat of survey.
